

# Poynton Relief Road

## ABOUT US

We are a privately owned company with an impressive 200 year history built on integrity and responsibility.

Specialising in Building, Civil Engineering, Interior Fit-Out, Facilities Management and Investments, we operate through a network of regional offices across the UK and Ireland.

## ABOUT THE PROJECT

We are working with Cheshire East Council to develop a 3km long, two-way single carriage way road.

As well as the upgrade of two off-site junctions at Adlington Crossroads and Bonis Hall Lane, both of which are situated along the A523 London Road.

Additional features include cycleway and footway facilities and two new accommodation overbridges.

£735m turnover and an order book in excess of £1bn

Over 2200+ talented employees

Currently active throughout 100+ live sites

The main objective for this project is to relieve the existing Poynton town traffic and improve connectivity between Macclesfield, Stockport, Manchester Airport and the wider area.

The scheme will also deliver a range of complementary measures on the A523 London Road to Macclesfield that address road safety and congestion while mitigating wider environmental impacts from the traffic.

## POINT OF CONTACT

**Daniel Cawthra**  
Stakeholder and Communications Officer for Poynton Relief Road  
Chartered Institute Public Relations

With over 12 years experience Daniel is the first point of contact for local residents, businesses and stakeholders. He will respond to any of your queries in a timely manner and will routinely provide clear and concise information on upcoming works to minimise the impact of the operations on the community. Daniel has worked closely with Cheshire East council on previous projects and has established a great working relationship.

**Alastair Lewis**  
Contracts Manager  
CEng Member, Institute of Civil Engineers

Alastair is a chartered engineer with nearly 20 years' experience within the civil engineering and construction industry. As a Contracts Manager, Alastair is responsible for the delivery of major projects.
